

[CLAIM]

1. Vehicle lift comprising vehicle lifting runways (12, 14)
and a volumetric operating system (10) having a
5 plurality of cylinders (16, 18, 20, 22) for movement of
the vehicle lifting runways (12, 14), including main
cylinders (16, 22) and secondary cylinders (18, 20), of
which the main cylinders (16, 22) receive the operating
fluid directly from supply means (24, 28, 30), and the
10 secondary cylinders (18, 20) receive the operating fluid
from the outlet (32, 34) of a respective one of the main
cylinders (16, 22), with each runway (12, 14) there is
associated at least one of the said main cylinders (16,
22), and at least one of the said secondary cylinders
15 (18, 20), characterized in that the outlet of each main
cylinder (16, 22) which is associated with one of the
runways (12, 14) supplies a secondary cylinder (18, 20)
which is associated with the other runway (12, 14).
